

XIVth Rencontres du Vietnam

Viet Nus 2017

Neutrinos: challenges and limitations

ICISE, Quy Nhon, Vietnam, July 9-22, 2017

Topics

Atmospheric Neutrinos Flux
High Energy Neutrinos Flux
Tau Neutrinos Studies
Solar Neutrinos
Systematics in Accelerator Neutrinos
Sterile Neutrinos

Quy Nhon is a coastal town in central Vietnam. It is about one-hour flight from Ho Chi Minh City and one and a half hour from Hanoi. The origins of the town go back to the 11th century Cham civilization, whose vestiges can be visited. The present town was officially founded over 100 years ago. The conference venue is ICISE, the new International Center for Interdisciplinary Science and Education.
